PROFESSIONAL SUMMARY

Senior Frontend Developer with 8+ years of experience building scalable enterprise web applications using **Angular, React.js, Typescript**. Experienced in designing reusable component architectures, performance focused applications, microfrontend solutions, and performance-focused applications for large-scale enterprise products. Proven ability to mentor developers, collaborate with global cross-functional teams, and deliver high-quality software across distributed environments. Strong frontend specialization with additional experience in **Node.js, Express.js, Python**, and leveraging modern AI tools to accelerate software design, planning, and development workflows.

SKILLS

Angular (8 Years)	Frontend - React and Next.js (4 Years)
TypeScript & JavaScript	Component Architecture & Reusable UI Development
RxJS, Signals & State Management	REST APIs & Authentication (Keycloak)
Performance Optimization & Lazy Loading	Microfrontends & Configuration-Driven UI
Code Reviews, Mentoring & Technical Leadership	AI-Assisted Software Development (ChatGPT, Claude, Cursor)

WORK HISTORY

SENIOR FRONTEND DEVELOPER 12/2024 to Current
NetCracker, Gurgaon, India

- Designed and developed an **Angular-based VS Code extension** enabling GenAI-assisted UI development workflows by integrating AI capabilities directly into the development environment.
- Designed and implemented a **microfrontend architecture** to improve modularity, scalability, maintainability, and independent feature development

across the extension.

- Developed **10–15 reusable Angular components** using **Signals** and shared services to promote consistency, code reuse, and maintainability across multiple modules.
- Owned features **end-to-end**, from requirement analysis and technical design to implementation, debugging, code reviews, and delivery.
- Optimized application performance by improving **bundle size**, rendering efficiency, and overall frontend responsiveness.
- Evaluated and integrated **VS Code APIs** and third-party libraries to extend editor capabilities while ensuring compatibility and maintainability.
- Mentored junior developers, reviewed pull requests, and collaborated with globally distributed teams to maintain code quality and engineering standards.
- Investigated and resolved complex application defects while supporting continuous enhancement of the developer platform.

FRONTEND DEVELOPER 08/2021 to 10/2024

Capgemini, Remote

- Served as the **frontend technical lead for a team of 3 engineers**, driving architectural decisions, mentoring developers, conducting code reviews, and establishing reusable development standards across the project.
- Built a **large-scale billing platform for Tata Communications** using **Angular 17**, supporting complete customer lifecycle management including onboarding, billing cycles, GST management, invoicing, and customer deactivation.
- Designed and developed **30+ reusable Angular components** using **Angular Material, RxJS, and Standalone Components**, improving development consistency and accelerating feature delivery across the application.
- Implemented **lazy loading**, consumed **REST APIs**, and integrated **Keycloak** authentication to build secure, scalable, and high-performance enterprise applications.
- Developed a **configuration-driven Angular platform** capable of dynamically rendering user interfaces based on **JSON configurations**, enabling rapid customization without application code changes.
- Integrated enterprise libraries including **AG Grid** and **Highcharts** to deliver advanced data visualization, reporting dashboards, and configurable data management experiences.
- Integrated a customer-facing **React-based network diagnostics application** within the Angular platform using **iframe-based integration**, displaying live telecom network data and interactive tower location maps.
- Owned **merge request reviews**, established reusable component standards, enforced coding best practices, and mentored developers through technical discussions, code reviews, and knowledge-sharing sessions.

SOFTWARE ENGINEER 05/2018 to 07/2021

Infosys Technologies, Chandigarh, India (Remote)

- Contributed to the development of an **enterprise recruitment platform** using **Angular**, supporting the complete hiring lifecycle from candidate onboarding through dynamic offer letter generation.
- Developed **6–7 reusable Angular components** and consumed **REST APIs** to build maintainable, responsive, and scalable user interfaces.
- Worked within a **Microfrontend architecture**, contributing features across multiple modules while gaining experience with enterprise-scale frontend development.
- Implemented complex **dynamic PDF generation** using **jsPDF**, generating offer letters with business-specific calculations and configurable content.
- Collaborated with a team of **4 frontend engineers** from the project's inception, participating in feature development, debugging, code reviews, and agile delivery.
- Contributed to a customer-facing **React job portal** by developing UI pages, integrating APIs, and gaining hands-on experience with React Hooks and routing.
- Applied **RxJS** to manage asynchronous data flows and improve frontend responsiveness while expanding expertise in Angular application development.

EDUCATION

Bachelor of Technology : Electronics And Communications Engineering, 06/2017
BBSB Engineering College - Sirhind, India

PROJECTS & CONTINUOUS LEARNING

- Regularly build customer-facing side projects to explore modern frontend architectures, AI-assisted development workflows, and emerging web technologies beyond professional responsibilities.
- Designed and currently developing **EventUally**, a cross-platform event planning application focused on simplifying group event planning through an intuitive user experience.
- Built a personal portfolio platform featuring a secure administrative dashboard for content, project, and portfolio management instead of a traditional static portfolio website.
- Leverage **ChatGPT, Claude, Cursor, and Antigravity** throughout the software development lifecycle for UX exploration, implementation planning, architectural discussions, and rapid prototyping, while personally reviewing all technical decisions and implementing security-critical functionality.

Learning outside of work is a very important aspect of my growth as a developer. Developed personal brand websites for friends and clients. Currently, working on creating a portfolio with smooth web experience.
