SUMMARY

Senior Frontend Engineer with **8+ years of experience** building enterprise-scale web applications, independently deployable microfrontends, data-intensive interfaces, and developer tooling. Strong expertise in **Angular, React, TypeScript, JavaScript, component architecture, signal-based state management, RxJS, and frontend performance optimization** across telecom, finance, recruitment, and developer platforms.

PROFESSIONAL EXPERIENCE

NETCRACKER, SOFTWARE ENGINEER	12/2024 – 08/2026 Gurgaon
- Designed and developed an Angular-based VS Code extension for a commercial low-code platform, enabling developers to create and manage UI and application configurations through YAML and JSON. - Reduced production frontend bundle size by 35% through lazy-loading improvements, dependency cleanup, and optimization of shared library usage. - Owned 5+ features from requirements through production delivery, including technical design, implementation, debugging, and peer review. - Built 10–15 reusable Angular components using Signals and shared services, implementing local and shared state management, computed state, and component communication using <code>input()</code>, <code>output()</code>, and <code>model()</code>. - Integrated TypeScript-based Data API and validation modules as reusable npm libraries and worked with VS Code APIs for extension communication and functionality.	
CAPGEMINI - Client: Tata Communications, SOFTWARE ENGINEER	08/2021 – 10/2024 Remote, Gurgaon
- Built enterprise billing and analytics applications supporting 5,000+ internal users and 100,000+ monthly page hits, using Angular, RxJS, REST APIs, AG Grid, and Highcharts. - Developed 15+ reusable components and integrated Keycloak for secure authentication and access management. - Independently implemented AG Grid for data-intensive workflows, replacing traditional Bootstrap-based tables and integrating server-side filtering, sorting, and offset-based pagination for datasets exceeding 1M records. - Contributed to frontend architecture and technical discussions, collaborated with backend teams on data contracts, and independently evaluated and introduced Highcharts for application data visualization. - Developed a reusable configuration-driven Angular UI where JSON configurations dynamically controlled page structure and behavior. - Contributed substantially to the frontend development of an internal telecom monitoring and troubleshooting tool using React, Material UI, Highcharts, REST APIs, and React Flow. - Mentored 3 developers and supported frontend implementation and technical problem-solving across the team.	
INFOSYS, SENIOR SOFTWARE DEVELOPER	05/2018 – 07/2021
INTAP Recruitment & Talent Acquisition	Remote, Chandigarh
- Progressed from System Engineer Trainee to Senior Software Developer, taking increasing ownership of frontend features and delivery. - Developed independently deployable microfrontends and owned features from requirements through implementation, deployment, and maintenance. - Automated recruitment workflows from job application through offer generation and release, reducing manual operational work by approximately 40%. - Built 5+ reusable UI components and integrated jsPDF to automate offer-letter generation. - Reduced production frontend bundle size from 12 MB to 6.8 MB, while maintaining 90+ Lighthouse scores and clean SonarQube standards.	

CSTR | Banking & Finance

- Built custom banking workflows using **React, Redux, GraphQL, and Material UI**, taking ownership of frontend implementation for the project.
- Integrated GraphQL queries and created custom frontend request objects for backend data operations.
- Reduced signup-to-onboarding interactions by approximately **20%** and implemented **WCAG 2.0 accessibility** improvements.

SKILLS

Frontend

Angular, React, Next.js, TypeScript, JavaScript, HTML5, CSS3

APIs & Backend

REST APIs, GraphQL, Node.js, Express.js, Microservices Integration, Keycloak, VS Code APIs

Testing & Delivery

Jest, React Testing Library, Jenkins, CI/CD, Git, GitHub

AI-Assisted Engineering

ChatGPT, Claude, Claude Code, Cursor, Antigravity

State & Architecture

RxJS, Angular Signals, Signal-Based State Management, Redux, Microfrontends, Component Architecture, Reusable UI Development, Configuration-Driven UI, Lazy Loading

UI & Quality

AG Grid, Highcharts, React Flow, Angular Material, Material UI, Tailwind CSS, shadcn/ui, Bootstrap, WCAG, SonarQube

Data & Platforms

PostgreSQL, MongoDB, Supabase, Supabase Auth, Vercel, Railway, Resend

Familiar With

AWS Lambda, gRPC, RPC, System Design, Data Structures, Web Security

PROJECTS

Portfolio Platform,

07/2026

Next.js • TypeScript • Tailwind CSS • MongoDB • Cloudflare Turnstile • Resend • Vercel

Full-stack, admin-managed portfolio platform with server-side functionality, API routes, content management, bot protection, rate limiting, analytics, and email notifications.

EventUally, *React Native • Expo • TypeScript • Node.js • Express.js • Prisma • PostgreSQL •*

05/2026

Supabase • Railway • Resend

Cross-platform event-planning platform for iOS and Android, currently in **private beta**, featuring group planning workflows, REST APIs, Supabase authentication, and PostgreSQL-backed data management.

LANGUAGES

Hindi | English | German: A1 Level

EDUCATION

B.Tech, Electronics & Communication Engineering,

08/2013 – 06/2017

BBSB Engineering College, Fatehgarh Sahib, Punjab

Sirhind
